Nine frozen synthetic gates ($n = 10$ seeds each, all passed) and the 30-seed S5 run
S1 sigma over crb
S2 weighted angle deg
S3 relative gap
S4 max principal angle deg
S5 pca weighted residual to observed
S5 (30-seed confirmatory) pca weighted residual to observed
S6 best rank by clean mse
S7 sigma over oracle.4
S8 mean chi2 per dof
S9 diagonal over full sigma
